Scientific Activities:

Within the College	Outside the College
Isolate fungal toxins from dairy	Histoimmunochimistry course
Detection of microbial contaminants in food	Training course and educational rehabilitation
first aid	Educational techniques course
Measuring vital signs	Tissue cutting cycle
Pathological analyzes	Course on Molecular Polymerization Technology (PCP)
Statistical Analysis Program	A course on the separation of mycotoxins from food
Measure the level of blood fat	Course on separation of active compounds from plants
first aid	Tissue cutting cycle
Arabic Language Safety Course	Mycotoxins and their biological effects
Isolate fungal toxins from dairy	Workshop on the work of expert committees
Detection of microbial contaminants in food	Chemical Safety and Security Course
first aid	A workshop to clarify the mechanism of laboratory evaluation
Measuring vital signs	Workshop on the course system
Workshop on courses	A course on chemical and chemical poisoning
A seminar on mycotoxins	International Workshop on Immunohistochemistry
Course on the destructive effects of substance abuse on society	
Cycle of diseases caused by water trinity	

The use of sports models in biological aspects	Educational techniques course
Blood Group Examination Course	Tissue cutting cycle
Isolate fungal toxins from dairy	Course on Molecular Polymerization Technology (DCP)
Detection of microbial contaminants in food	A course on the separation of mycotoxins from food
